## PROFILE

Creative technologist and founder of Virtuosus with 7+ years taking ideas from concept to launch for artists and brands. Combines 3D, mixed reality and VFX with hands-on development, building the interactive layer in-house, from browser games with live multiplayer to AI-powered web tools. Creative Lead on Lil Uzi Vert's Clio-winning mixed reality UFO activation.

## AWARDS AND RECOGNITION

**Clio Award, 2026** · Music / Branded Content. Creative Lead, Lil Uzi Vert mixed reality UFO activation. clios.com

**The Webby Awards, 2026** · Official Honoree (Virtuosus).

## EXPERIENCE

**Virtuosus** · Founder, Creative Technologist and Lead CGI Artist — New York · 2018 to present

- Creative Lead on a mixed reality UFO activation for Lil Uzi Vert's Eternal Atake 2 rollout in NYC (2024). Led the concept, directed the shoot and ran the CGI and VFX pipeline. Won a 2026 Clio Award; covered by Complex and The New Yorker.
- Designed and built TANA.EXE (2026), a browser game world for the artist Tana, shipped in 3 chapters: an explorable apartment, a 50 player live multiplayer release party and a wave-based zombie shooter. HTML5 Canvas, JavaScript, Supabase Realtime, Vercel. **15,000+ plays**, **30%** of players installed it as a home screen app, **1,500** found the hidden exclusive content.
- Directed a full CGI short around the Empire State Building for the rollout of Tyler, the Creator's DON'T TAP THE GLASS (2025), shared by the building's official account.
- Designed and rendered 3D product ad concepts for YEEZY Pods for Ye's team.
- Built the 3D models and CGI for a Paramount Avatar: The Last Airbender mixed reality stunt with BlackFlag: a monolith in Central Park with an Appa shadow moment (2026).
- Built AR portal experiences in Unity (2019), and created AR filters, product renders and label visuals for music, fashion and tech clients, reaching millions of online impressions.
- Run projects end to end: scoping and pricing, concept, production, delivery and client communication.

**SUNSEX** · Creator and Developer — Personal IP · ongoing

- Built sunsex.xyz, a real-life mirror social RPG: a Leaflet world map with persistent player profiles on Supabase.
- Built DressUp, an AI avatar studio for virtual try-on and avatar generation through Replicate, with a credit system and Stripe checkout.
- Designed a photoreal isometric CGI world and the Nomad Suitcase content series around it.
